

MANAGED TRANSPORT

Gain competitive advantage by strategically managing your transport.

Imagine a solution that addresses your unique transportation challenges in a standardized manner, taking an integrated approach at managing your flow of goods and information. External influences, such as fluctuations in demand due to eCommerce or volatility of fuel prices, are left in the hands of the leading industry experts, while you focus on your core business.

A TRUSTED PARTNER

Synchronize your flow of goods and information

If you are looking for total control over your flows of goods and information, then we can provide an entire outsourced domestic transport function.

Optimize total transport costs

Optimize mode selections, take advantage of shared capability for continuous movement, and improve costs by strategically sourcing and procuring carriers at agreed rates. As we are the leading procurer of sub-contract fleets worldwide, you will benefit from an optimally planned network and economies of scale.

Centralize transport control

You will gain better visibility and control over your centralized transport costs, with one supplier managing all of your transport flows and consolidating carriers on your behalf.

Enhance transport expertise and resources

Focus on your core business by allowing a trusted expert, with the largest global transportation footprint, to manage your transport. Gain access to new markets with the same high level of operational quality, no matter the country.

DHL MANAGED TRANSPORT SOLUTION CAPABILITIES
