

A radiant future

The power of the sun brings unlimited potential to help ensure a more sustainable future for us all.

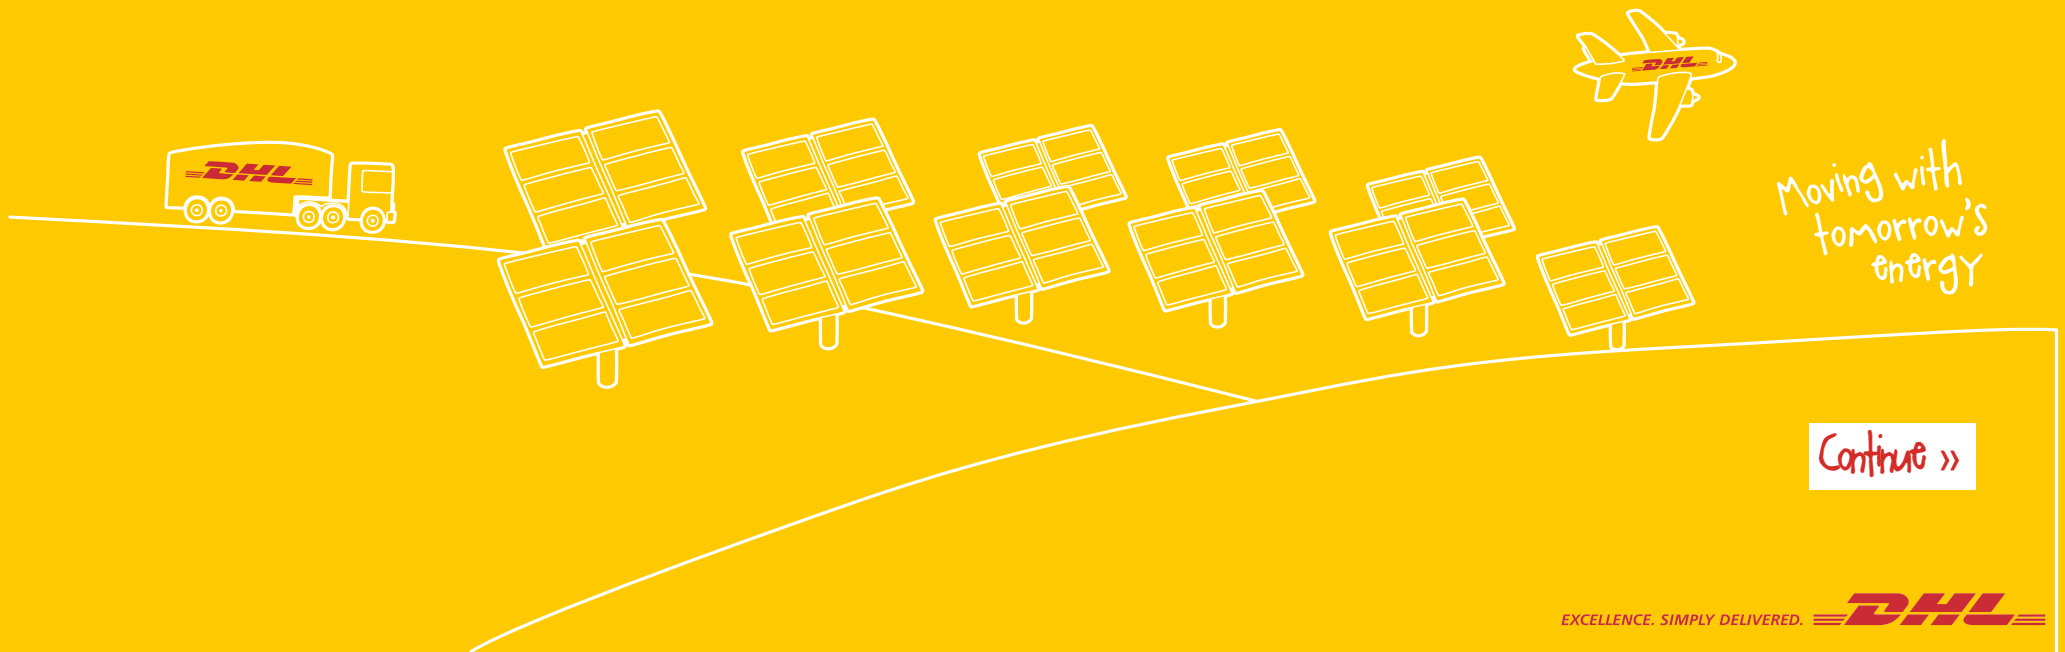

The drive for a more sustainable environment and the push to increase energy supplies from renewable sources are a huge opportunity for those businesses with the right expertise, technology and supply chains in place.

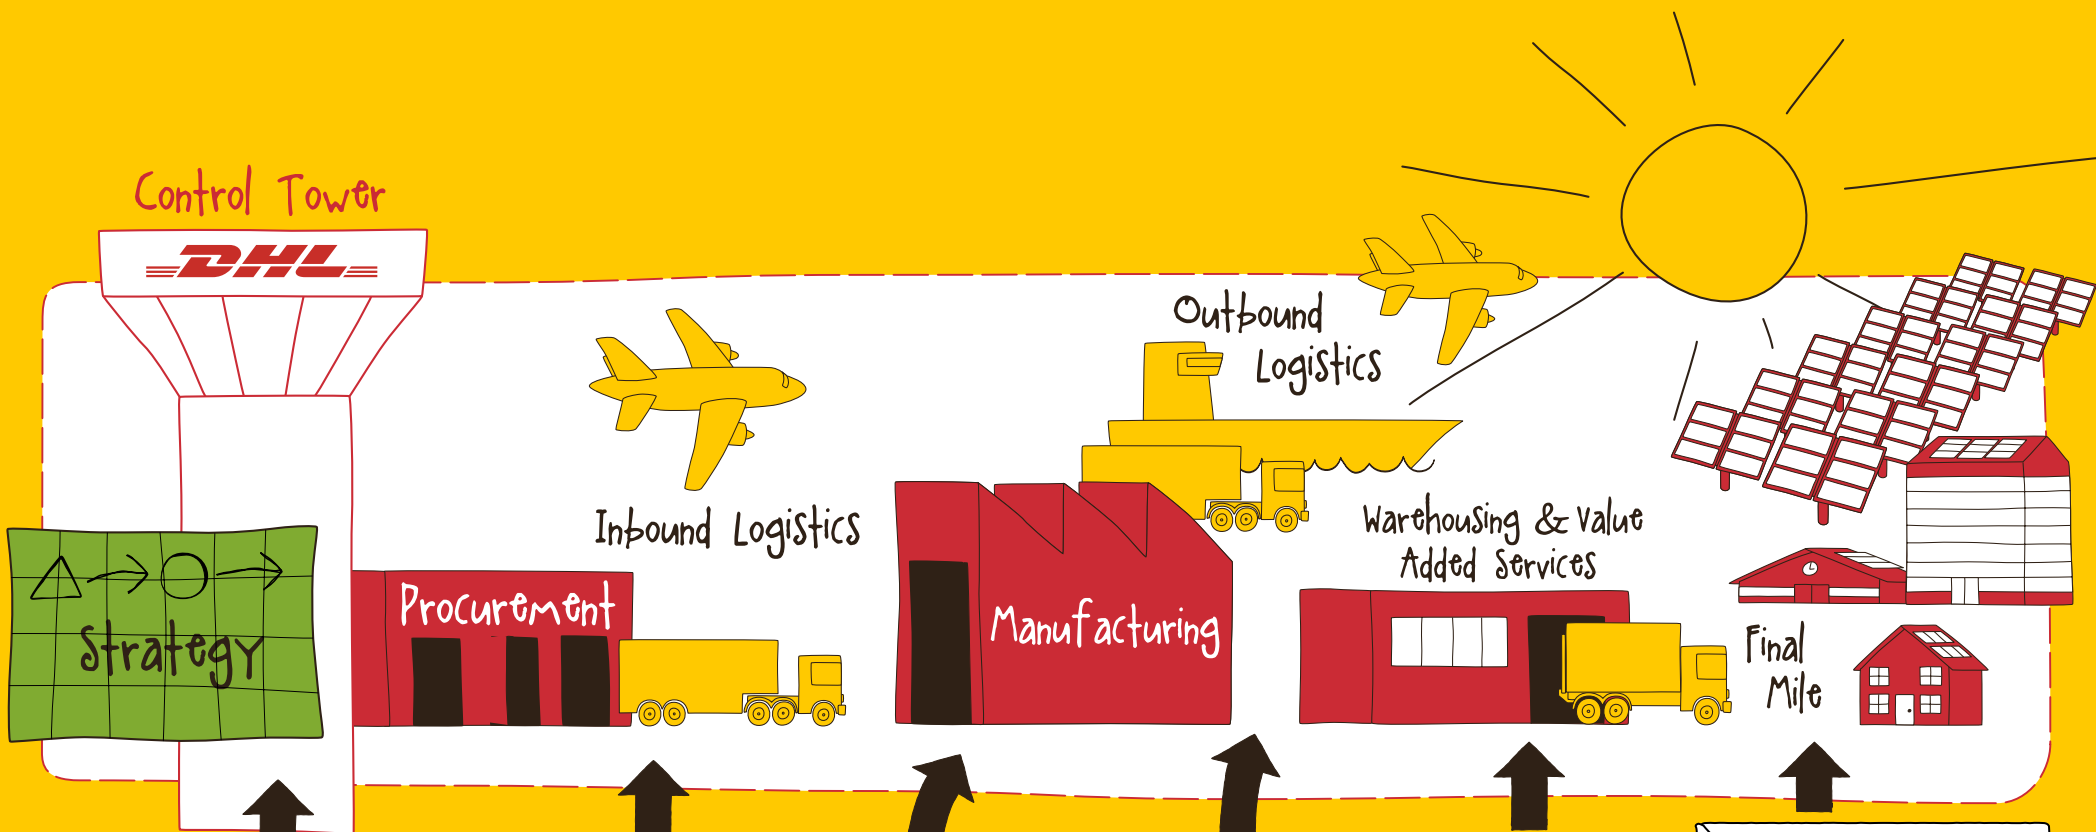

But in an increasingly globalizing and competitive industry you need to stay ahead of market forces and pressures that can act as a barrier to your business making the most of them.

That's where DHL can help.

Our end-to-end logistics, proven solar industry expertise and global distribution network means we are able to support you in making the most of the opportunities across the globe and grow your business.

So let us work with you to capture tomorrow's energy.

STRATEGY & PROCUREMENT

Our renewable energy team will increase your speed to market by designing an optimal supply chain and managing your procurement to drive down costs. We'll even advise you on wider operational issues through our supply chain consultants.

INBOUND LOGISTICS

Tapping into our global transportation network will ensure you have what you need, where you need it. With the ability to track and trace throughout the supply chain journey.

MANUFACTURING

Our inbound-to-manufacturing best practice service will manage components in-plant, provide an up to date inventory and sequence delivery of parts to the right assembly point.

OUTBOUND LOGISTICS

Our global network will optimise transportation, reducing carbon emissions and ensuring safe and reliable handling of your valuable cargo.

WAREHOUSING & VALUE ADDED SERVICE

Our regional and local warehouses (bonded and non-bonded) provide you with an optimal set-up to quickly respond to customer demands. We provide value added services, such as pick and pack, customs clearance and fiscal representation.

FINAL MILE

With local expertise and knowledge in over 220 countries, we have the capability of delivering modules to your customers - from solar parks to residential homes - and making sure your promises are kept.

A Smarter world

DHL has moved the world, quite literally.

You might think that we deliver billions of parcels. Well we do but delivering parcels is only one part of the story.

DHL is the supply chain expert helping grow some of the biggest global businesses including those in the solar energy sector.

Our understanding and knowledge learned from a variety of industries is vast. We're used to dealing with competitive environments, facilitating customer distribution and market expansion.

We embrace innovation and technology to help us reach the next level in everything we do.

We design simple, safe and sustainable solutions both for our customers and ourselves; and we can offer an all-inclusive service to help make your shipments carbon-neutral.

All of this under one DHL roof which translates into increased control, safety and transparency for you and your customers.
