

# DHL Web Shipping for eProcurement.

Prepare and book shipments online in a few simple steps – directly from your eProcurement system.

## Integrated shipping and eProcurement.

You've negotiated an excellent global shipping deal. Now, how can you get the most out of it? Without long delays to implement new processes? And without heavy training costs?

DHL gives you the simplicity of Web Shipping that plugs directly into any off-the-shelf eProcurement system - with powerful new functionality to manage the purchasing of shipping services throughout your organisation. So you can maximise your savings.

Together with a specially designed management module for a central purchasing or mailroom function, *DHL WEB SHIPPING FOR ePROCUREMENT* lets you provide secure online shipping to all your employees while improving overall efficiency and controlling costs.

Once you've signed the deal with DHL, shipping will only get easier.

The quick and easy way to handle shipping.

## Online shipping for everyone.

**DHL WEB SHIPPING FOR ePROCUREMENT** puts online shipping at the fingertips of all your employees - whether shipping to a colleague or a customer worldwide.

With secure access to the latest shipping services and agreed rates, everyone can take advantage of the simple step-by-step process and gain the benefits of working more efficiently and according to the contractual agreement.

- Make shipping easier at a user level: from selecting the right shipping service to quickly preparing shipping and customs documents, from booking a pick-up to real-time tracking of each shipment
- Facilitate internal purchasing processes: with requisition and purchase order interfaces hard-wired into the shipping process and support for multi-stage approval of each shipment
- Manage shipping more efficiently: additional central management features for eProcurement customers enable simple user access control, centralised shipment processing options, daily reporting... and more
- Integrate shipping directly into existing eProcurement systems: plugs into market-leading eProcurement platforms such as Ariba so you can start shipping online within minutes.

### How your business gains

- Direct access to DHL from your eProcurement portal for maximum efficiency and control
- No installation or training costs
- Saves time and money every day, by optimising many internal processes and reducing paperwork
- Complete security. The latest encryption technology ensures safe, secure transactions over the Internet
- Helps reduce purchasing costs and eliminates rogue spending.

### Technical requirements

- Any eProcurement system which can punch-out to supplier websites – like DHL **WEB SHIPPING FOR ePROCUREMENT** - using cXML 1.2 messaging
- Internet access & web browser.
