

BONDED WAREHOUSE SOLUTION FOR EV BATTERIES

DHL ENABLED AN EV BATTERY MANUFACTURER TO STORE THEIR BATTERIES IN SLOVAKIA COMPLIANTLY AND STRATEGICALLY

CUSTOMER CHALLENGES

Situation

The existing logistics provider was not able to fulfill the requirements for the growing business in Slovakia.

Risks

None-compliant or reduced capacity of the Slovakian warehouse for batteries under the **changing regulations in Europe**

Requirements

Compliant warehouse, located near the customer's facility

DHL SOLUTION

Requirements fulfilled

Relocation to a **new compliant warehouse (16,800sqm)** with capacity to store up to 6,000 pallets of EV batteries and be located **within 30 km of customer's facility**. DHL customized contract which considers the regulatory risks.

Value-adding Services

New warehouse as a **bonded warehouse** to serve the wider EU market.

CUSTOMER BENEFITS

Compliant and holistic solution

DHL's **EV regulatory experts** ensured warehouse complies with latest regulations in EU, while enabling the additional benefits of a bonded facility.

Quick delivery of solution

Successful implementation of the solution to meet the **time-sensitive requirements** outlined by customer.

Excellent and stable service

DHL warehouse operations are subjected to the **highest standards**, ensuring service quality.
