

DHL introduces 35 Bio-LNG Trucks into British multinational retailer's fleet in the UK

DHL adds 35 new Volvo FM Liquefied Natural Gas (LNG) tractor units and replaces 35 diesel trucks

Customer Challenge

- Fleet of diesel trucks delivering goods for Customer

DHL Solution

- Introduction of 35 **new Bio-LNG** trucks fuelled with bio-LNG, replacing 35 diesel trucks
- Volvo G13C engine to deliver the same performance as its diesel-only counterpart with **max range of 1000 km**
- Trucks running in Peterborough, Swindon and Castle Donington, UK

Benefits and Impact

- Up to **80% reduction** in carbon emissions when fueled with bio-LNG
- Expected reduction of **3,000 tonnes CO₂e** in GHG emissions each year

1 HVO (hydrotreated vegetable oil) is a renewable fuel made of vegetable oils, used cooking oils, residues, and animal fat.
2 The number depends on the origin of feedstock used during production, measured over a well-to-wheel cycle, according to TotalEnergies.
