

Meeting customer's ambitious sustainability targets for last mile large item home delivery

DHL Supply Chain has partnered with our customer to meet their sustainability needs

Customer Challenge

- Customer aims to become climate positive by 2030
- To achieve all customer home deliveries across 30 country markets using electric vehicles (EVs), or other low-emission solutions, by 2025.

DHL Solution

- Comprehensive review was conducted of the current UK&I Electric Vehicle market.
- A roadmap for vehicle and technology was planned and implemented
- Pilot for four weeks, utilizing two electric vehicles
- Driver training

Benefits and Impact

- Pilot resulted in savings of 927 kg CO₂e for 272 end customer deliveries
