

Multimodal Transport Proposal for Automotive OEM – Customized and sustainable solution

A customer is provided with a more efficient, automated, transparent and sustainable transport operations.

Customer Challenge

- Efficient and reliable Transport solution to ship parts from supplier and customer factories in Czechia and Spain to Germany
- Solution should ensure lead times and risk profiles, as well as being flexible enough for changes
- Full Supply-Chain Visibility required

DHL Solution

- Multi-modal transport solutions which includes two rail legs from CZ to DE and ES to DE
- Rail connection between CZ and DE (3x week)
- Rail connection between ES and DE (5x a week)

Benefits and Impact

- Higher transport quality and safety
- Cost reduction by ~13% (ES-DE) and ~4 % (CZ-DE)
- 58% CO₂e reduction (162 Kg/ton-km per trip)
