Global

Trends

- New emerging technologies while others shut down, e.g.
- LPWAN:
 - Low power
 - Long range
 - Low cost
- Cellular:
 - LTE Cat M
 - IEEE 802.15.4g*
 - 2G shutdown (JPN, CAN, ...)

* Standard for local and metropolitan area networks

NEXT-GENERATION WIRELESS

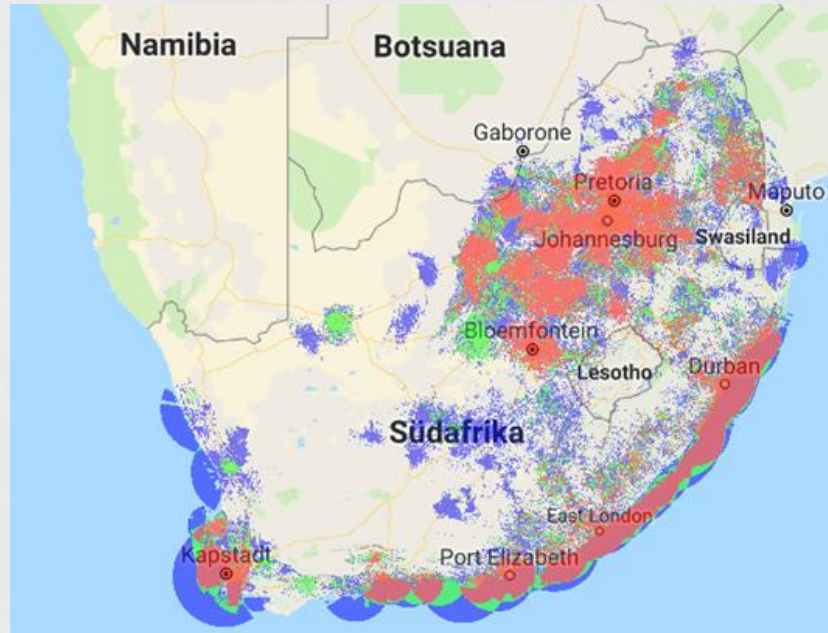

Manhole Tampering Solution in South Africa – Sigfox

- There are just under 2.2 million manholes in South Africa being used by telecommunications companies and municipalities
- Covers are often tampered with or stolen, resulting in a person dying from falling into a manhole, every four days
- Telecommunications companies and municipalities can detect tampering and theft, enabling them to mitigate the risk to citizens
- Sensors placed on the manholes are battery operated and batteries have a 10-year lifespan

Next-Generation Visibility

DHLs active transmitting solution for visibility

- Modern **tracking & tracing** by active device (3G, Wifi, BLE) with global coverage
- **Comprehensive set** of sensors included
- **Geofencing** & active steering options
- **Cost efficient**, scalable on-demand service
- **Plug-and-play** mobile solution
- **API** available
- **Visibility-as-a-service**
- **Airline approvals** available and further in progress

DHLs active transmitting solution for visibility

BMW Shock monitoring Test – DHL Smart Sensor

- Street conditions in Mexico lead to deformations and damages on sunroof modules during inbound shipments
- **DHL supports BMW in testing real conditions** before start of standard operations / production
- First test run show significant shock impacts on rack and module
 - Critical hotspots on street identified
 - Rack is buffering shocks only to limited extend (esp. on vertical axis)
- **Further tests** after readjustment of rack & definition of „slow speed sections“
 - No shocks on x-axis and y-axis

DISTRIBUTED

Blockchain in logistics

Faster &
leaner logistics in
global trade

- ✓ Authenticity
- ✓ Ethically sourced
- ✓ Perfect condition

Improving transparency
& traceability
in supply chains

Automating commercial processes in logistics with smart contracts

Blockchain in logistics

1. 90% of world trade is carried out by > 50,000 merchant ships every year
2. A simple shipment of refrigerated goods from East Africa to Europe can go through nearly 30 people and organizations with more than 200 interactions and communications among these parties
3. Solutions that reduce supply chain barriers to trade could increase global gross domestic product by near 5% and global trade by 15% (WEF)

Track & Trace: DHL + Accenture
