

INTERNATIONAL INBOUND-TO-MANUFACTURING LOGISTICS

Managing the complexity of multiple suppliers around the world while also controlling schedules, transportation mode and logistics cost

Commercial vehicle manufacturers plan production around either built-to-stock or customized fleet orders, and they often require parts to be sourced from several different countries.

TYPICAL BUSINESS CHALLENGES

- Managing multiple suppliers globally
- Managing purchase orders
- Ensuring on-time delivery to assembly plants
- Providing end-to-end shipment visibility
- Access to global transportation network
- Compliance in custom declaration
- Controlling costs

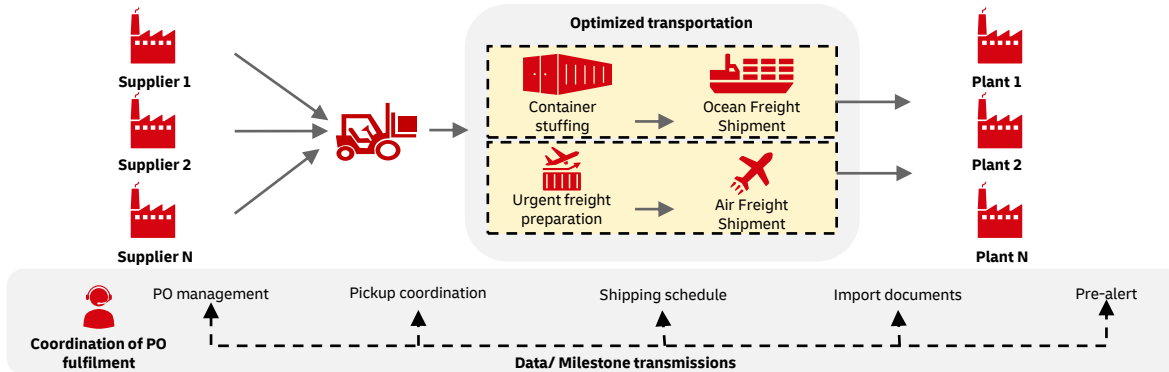

DHL SOLUTION

Combining DHL's global transportation network with substantial in-country experience of global operations, this solution effectively manages the flow of parts from multiple suppliers around the world and helps to keep production lines running at the commercial vehicle manufacturing plants.

SOLVING YOUR BUSINESS CHALLENGES

- ✓ **Managing suppliers** – A single point of contact to coordinate multiple suppliers and onboard new ones by establishing standard operating procedures and incoterms
- ✓ **Managing purchase orders** – Centralized control the order fulfilment and logistics processes per each POs
- ✓ **Ensuring on-time delivery to assembly plants** – Selection of best-fit carriers for timeline requirement, standardized processes for a seamless information flow, trained execution of contingency plans
- ✓ **Providing end-to-end shipment visibility** - Real-time shipment tracking, ensuring on-time arrival of parts for the production line
- ✓ **Access to global transportation network** – Leveraging the DHL global transportation network and scale
- ✓ **Compliance in custom declaration** - Global customs expertise, in-country knowledge of shipping and logistics requirements, and efficient exceptions handling
- ✓ **Controlling costs** – Different service levels for varying needs; innovations & continuous improvement to improve productivity

MANAGING THE END-TO-END GLOBAL FLOW OF PARTS FROM SUPPLIERS TO THE PRODUCTION LINE

INTERNATIONAL INBOUND-TO-MANUFACTURING LOGISTICS

KEY BENEFITS FOR YOUR BUSINESS

GLOBAL SUPPLY

Suppliers managed with a single point of contact

END-TO-END

From order placement to delivery at each plant
