

LEAD LOGISTICS PARTNER (FOR AEROSPACE & AVIATION)

Providing 24/7 neutral supply chain orchestration for order fulfilment, network optimization and supplier management

Aerospace and aviation organizations must swiftly and accurately fulfil orders in the supply chain, ensuring on-time delivery of the correct spares (with industry-related documentation), all the while working with carriers and logistics service providers to reduce the cost of doing business.

TYPICAL BUSINESS CHALLENGES

- Achieving visibility & management control
- Mitigating overall logistics costs
- Ensuring agile, reliable support for spares & components
- Improving on-time delivery; facilitating pickups
- Managing service levels of suppliers & logistics service providers

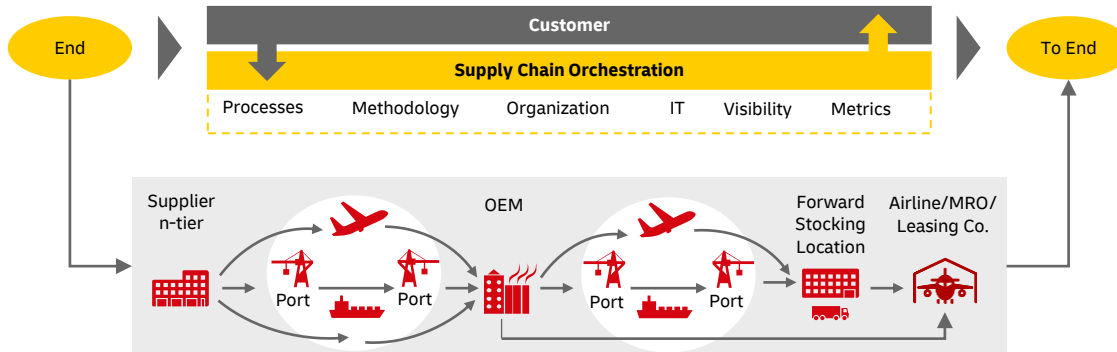

DHL SOLUTION

As the lead logistics partner, DHL delivers fully compliant, end-to-end, integrated supply chain orchestration for multiple stakeholders via a global or regional control tower. Decision making is centralized and standardized across every location, with shipment visibility data available in near real time.

SOLVING YOUR BUSINESS CHALLENGES

- ✓ **Achieving visibility & management control** – Supply chain orchestration enables high-quality end-to-end execution for inbound, manufacturing, distribution, delivery, and returns; control at global, regional, country, and site level
- ✓ **Mitigating overall logistics costs** – Holistic perspective; logistics value chain enhancements; process standardization; network optimization; multiple cost efficiencies in transportation, warehousing, value-added services, and inventory management
- ✓ **Ensuring agile, reliable support for spares & components** – Effective planning and management of parts via transport management system (TMS)
- ✓ **Improving on-time delivery; facilitating pickups** – Proactive shipment management to meet schedules and achieve continuous improvement; timely pickups (including drop shipments) to minimize late deliveries, reducing aircraft ground time and extended production schedules
- ✓ **Managing service levels of suppliers & logistics service providers** – Stakeholder rationalization; supplier contract management, scheduling, and fulfillment; coordinating and controlling suppliers, logistics service providers, and carriers; identifying and assessing key performance indicators (KPIs); accurate reporting, forecasting, and analytics

MANAGING TRANSPORTATION, LOGISTICS PROCESSES, AND MULTIPLE STAKEHOLDERS

LEAD LOGISTICS PARTNER

KEY BENEFITS FOR YOUR BUSINESS

CENTRALIZED

Global IT platform and agile global network infrastructure

COST SAVINGS

Savings aligned with the logistics / transportation program and initiatives

OPTIMIZED

Integrated logistics service provider network through re-engineered transportation optimization

STABILITY

Centralized operations enable demand and forecast stability

PEACE OF MIND

A partner that adheres to the highest level of regulatory compliance
