

# Simplifying Bulk Shipments intended for multiple consignees by using Breakbulk Express (BBX), resulting in cost savings

A leading fashion products manufacturer had 100+ orders everyday from a particular country. The activity of booking multiple airway bills & filing documents took away precious time from the shipper. Additionally, filing and BRC costs multiplied. DHL Express activated Breakbulk Express to help the customer save costs.

## THE BENEFITS DELIVERED FOR THE BRAND

### One Point of Contact

Single-window paperwork handling

### Time Efficiency

Bulk AWB generation saved 4+ hours of processing time daily

### Cost Savings

Lower filing fees & single BRC closure

### Faster Clearance

Resulting in deliveries in as quickly as two days from the dispatch date

## HOW DHL EXPRESS MADE IT HAPPEN

- The customer was provided a tool which allowed bulk information upload. **AWB was automatically generated** for all 100 shipments together.
- DHL filed these shipments intended for the same country under **one 'Mother' AWB**. Inside this Mother AWB were 100 'Baby' AWBs. **Hence only one shipping bill** was filed, requiring just one BRC.
- The manufacturer attended an expert consulting session with our filing agent for correction classification. This ensured **correct declaration & same-day customs clearance** due to clear documentation.
- In the second phase, we **integrated the NIC portal with our booking tool** which automated the e-invoicing process, saving even more time.
