

Use case: Delivering innovative life-saving Radioligand cancer therapies within 24 hours

Customer challenges:

- **High expectations by top management** on successful product launch
- Requires **extensive detailed pre-planning of treatments** between hospitals / patients / production
- **Short shelf-life** results into **extreme time-pressure** for deliveries involving a **high spend on logistics**
- **High value and tailor-made** therapies requiring **compliant and stringent quality solutions**

DHL Group solution:

End-to-end offering using capabilities in DGF and DSC Business Units including e.g.:

- **White glove**, mission critical specialized services
- **24/7/365** dedicated Life Science experts
- **Chain of custody monitoring** & intervention and real-time visibility (GPS tracking, temperature, tilt, etc.)
- **Global scalable solutions** to cater to expanding patient needs

Customer currently being ramped up with high growth and scaling opportunities in coming years:

 **1000+**
shipments

 **11**
countries and growing
