LOGISTIC SOLUTIONS FOR PHARMACEUTICAL
AND CHEMICAL PRODUCTS

*Temperature-controlled

*GDP certified

DHL – Part of a global group

As part of DHL Freight, we specialize in the logistics of **pharmaceutical products** and **temperature-sensitive chemicals**. By land, we find the right solutions for full truck loads (FTL).

We are part of the **DHL Group**.

DHL Group employs around 550,000 people in more than 220 countries and territories around the world. In 2022, the Group generated more than 94 billion euros in revenue.

Our transport solutions for pharmaceuticals

With a state-of-the-art fleet specialized in pharmaceutical transports, we are constantly on duty for you. Our dispatchers steer them **flexible through all of Europe.**

With **modern technology** and networking, we know where your goods are at all times and plan in an **environmentally** conscious as well as **efficient** manner.

Our Services

- **Transport solutions** for pharmaceutical and chemical products within Europe (incl. UK).
 - **Temperature controlled** in special transport units
 - **GDP certified** transports in special transport units

Focus on your core business and reduce your administrative workload

Our Control Tower Solution

- With our Control Tower, we offer you a "**single point of entry**", automated processes and one hundred percent **transparency** over your current transport orders.
- Customer and transport companies are connected via **electronic data interchange**. This applies to the entire domestic and international supply chain, regardless of the country of origin or destination.

- With our Control Tower, we offer **integrated supply chain control**. All processes, from order to execution, run seamlessly and automatically.
- Regarding **land and air transport**, you can use our 24/7 service 365 days a year.
- The Control Tower thus offers **enormous advantages in terms of transparency, efficiency and convenience**.

Your supply chains matter to us

We can only make a sustainable and positive impact if we follow a clear strategy.

On our journey towards sustainable logistics, we focus on the three areas where we can achieve the most.

4,7 Mio.

hours of training and development for employees

1. global

logistics company that has offered climate-friendly products.

Zero emissions by 2050 –

Ambitious environmental goal

86%

renewable energy worldwide

37%

Improvement in CO₂-efficiency since 2007

~18.000

Vehicles with alternative propulsion

7 Bn. euros investment in green technologies by 2030

- Increasing the use of **sustainable marine fuel**
- Increasing the use of **sustainable aviation fuels**
- **Green alternatives** for all core products

Reducing the CO₂-footprint with **GoGreen Plus**
