DHL

SPECIALIST NETWORK

Our specialist network allows you to connect directly with the best fresh produce producers in Spain and have your produce transported from farm to market in 24 / 48 hours in Spain, or 12 / 72 hours in other European countries, depending on the final destination and the type of produce being delivered.

With over 2,000 collection points in Spain alone, 131 in France and an additional 150 across Europe, our extensive produce

cold chain network handles more than 500,000 orders annually; 300 trucks each day and more than 3.6 million pallets each year. And that is all overseen by a team of over 180 experts who are dedicated to providing a service you can trust every step of the way.

We collect directly from farmers and co-operatives and deliver the produce to retailers and markets.

MAKING THE SUPPLY CHAIN GREENER WITH OUR INTERMODAL SERVICES

For your international transport, we offer an intermodal option, delivering to several destinations in Europe. With this service you'll be able to reduce your emissions without any increase in costs.

Join us on Mission 2050: Zero Emissions.

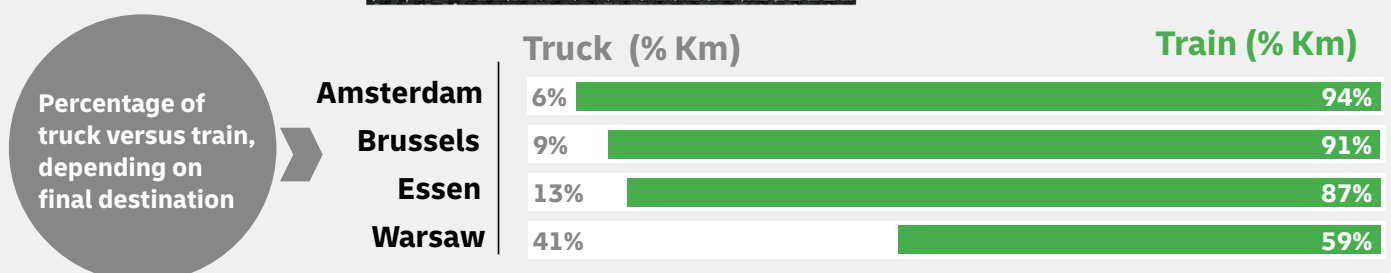

Multimodal transport offers resiliency, sustainability and cost effectiveness. The use of rail and road can speed up the transportation of your goods across longer distances, preventing delays at borders or as the result of road congestion. Multimodal transport is a greener option that will help you to meet your sustainability goals.

Through our Connected Control Towers operations you have full end-to-end visibility of your shipments across every leg of their journey, giving you peace of mind that they will arrive safely, securely and on schedule at their destination.

TRUCK+TRAIN+TRUCK

INNOVATION IN LOGISTICS

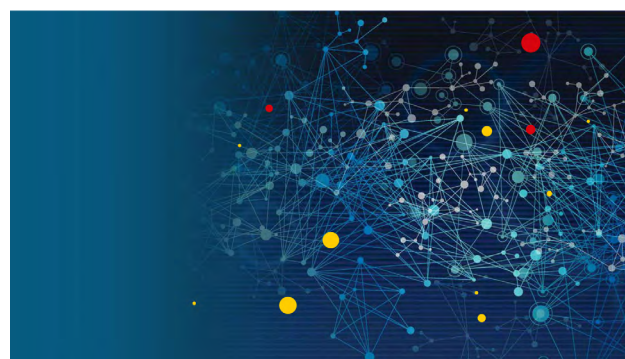

DHL is leader in innovation in logistics and is continuously investigating social, business and technology trends that are most likely to shape the future of logistics.

Your fruit and vegetable logistics operation will benefit directly from four innovations:

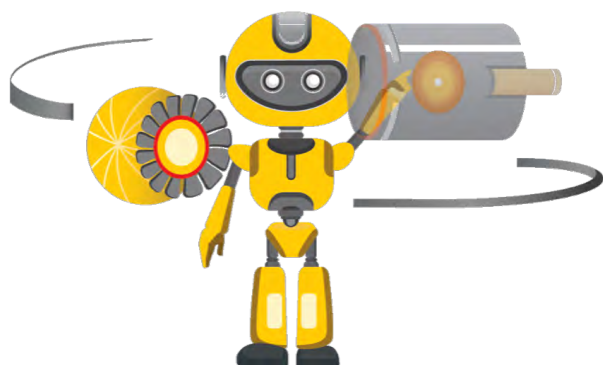

MySupplyChain Track & Trace

1. MySupplyChain

2. Smart Planning

3. RPA – Robotics Process Automatization

4. Smart Scanning

1. MY SUPPLY CHAIN

Our MySupplyChain tool delivers integrated warehouse and transport insights which are accessible online – anytime, anywhere.

KEY BENEFITS

- Single sign on to MySupplyChain.dhl.com on mobile or desktop
- Access to multiple IT applications from different business units available on one landing page
- Data insights provided within one, secure, easy to use platform

COMPLEXITY SIMPLIFIED

- MySupplyChain provides a single point of access for integrated SC functions

2. SMART PLANNING

We have a powerful digital integrated platform which uses Big Data, Data Analytics and Machine Learning to model forecasts. Our smart planning approach improves the productivity and profitability of warehouse and transport operations by forecasting volumes of key warehouse processes and transport origin-destination combinations, to be a step ahead of your transport needs in the short, medium and long term,

We have implemented demand forecasting in transport with fantastic results using multiple data points:

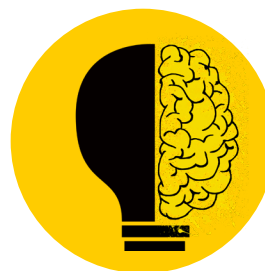

WMS AND TMS HISTORICAL DATA

More than two years of historical data to capture trends and seasonality

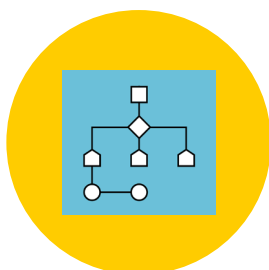

HEURISTIC VS DATA

Business Knowledge and user experience explains results and improve algorithms

BEST FIT ALGORITHM

Best Algorithm selection (used on a daily basis) for each forecast model

EXTERNAL DATA

For example, National and local bank holidays, calendar events, trends,...

“

“DHL will invest 2.000 mio€ in DIGITALIZATION by 2025”

”

3. RPA – ROBOTICS PROCESS AUTOMATIZATION

Robotics Process Automation replaces manual data entry & capture processes with an automated digital back-office solution. Workflows are digitalized to take on rule-based, high-volume and low variability tasks.

FEATURES

Replaces manual data entry & captures processes with digital back-office solution

Digitalizes workflows

Improves employee satisfaction

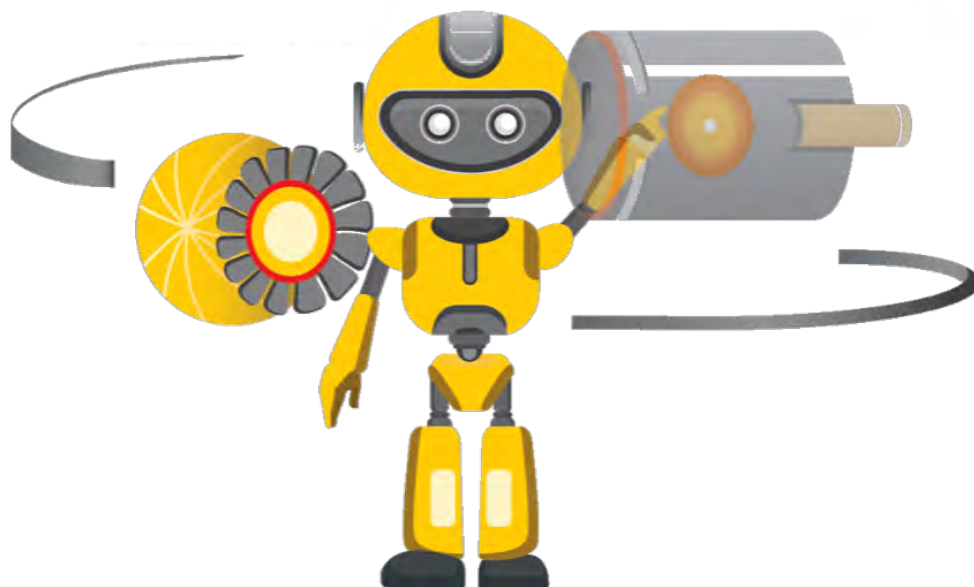

Higher data accuracy

Takes over time-consuming, repetitive work

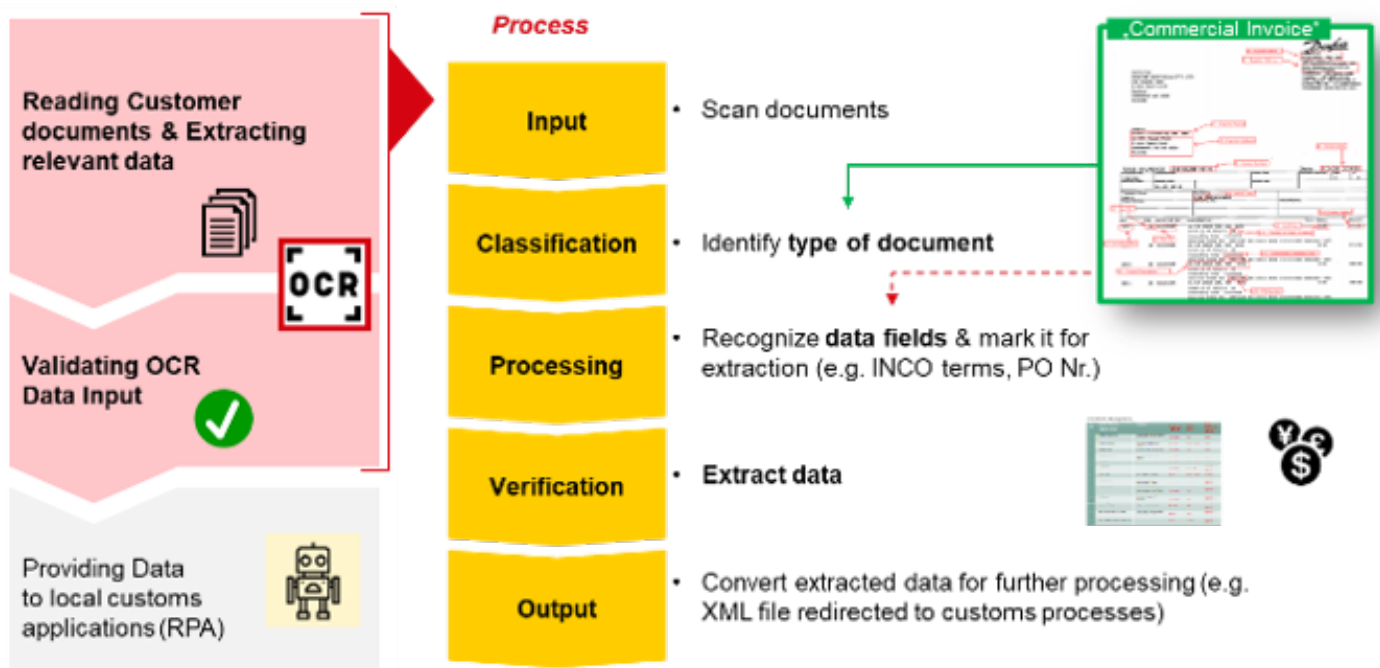

Frees up workforce

4. SMART SCANNING

Our smart scanning extracts relevant data from our customers documents to create documentation that is required throughout the shipment process. It provides accurate information to Customs applications to ensure produce is not held up as it crosses borders.

WITH DHL FRESH PRODUCE TRAVELS BETTER

Robotics Process Automation replaces manual data entry & capture processes with an automated digital back-office solution. Workflows are digitalized to take on rule-based, high-volume and low variability tasks.
