DHL Freight Magyarország Kft.
H-1185 Budapest, BUD Nemzetközi Repülőtér, DHL épület (264)

Dear valued Customer,

In DHL Freight we continue to closely monitor market developments in order to secure best quality and reliability of our service for you. Consequences from COVID-19 pandemic, high cost pressure, disruptions in supply chains, driver shortage and legal changes (e.g. EU Mobility Package) continue challenging the logistics industry in 2022. The permanent withdrawal of drivers from the European market, combined with the stable demand for freight space is further intensifying the shortage of available capacities in the second half of 2022.

From what we see after Q2 2022, we need to expect unprecedented capacity challenges until the end of the year. We have and will further secure capacities needed to be able to continuously provide the best level of service you know and trust. However, due to an even greater expected demand in our peak season we will need to add a temporary

Peak Season Surcharge (PSS) of 4% as freight accessorial charge to the transportation rates.

The surcharge will apply in Europe to all FTL, PTL and LTL shipments between September 15th and December 31st, 2022.

We appreciate your understanding for this action, which we need to put into effect to face the significantly increasing cost of transportation and ensuring an ongoing high level of service also during peak season. Should you have any questions, please contact your local sales representative for more information.

Sincerely yours

Budapest, Augusztus 30th, 2022.

DHL Freight Hungary Ltd.
