LOW IMPACT SHIPMENTS, WITH SAF

THE CHOICE IS YOURS: DECIDE HOW MUCH TO REDUCE YOUR CO₂ EMISSIONS OR HOW MUCH TO INVEST IN SAF.

Sustainable Aviation Fuel is the alternative to conventional jet fuel obtained from petroleum. Instead, SAF is produced from **more sustainable alternative** raw materials, such as used cooking oil, maize, waste, hydrogen or CO₂ synthesis.

By choosing SAF:

SAF can effectively **reduce lifecycle emissions** of typical aviation fuel emissions by up to

70-80%

SAF reduces other **harmful emissions** like Particulates and Sulphur by

90-100%

AN ENVIRONMENTALLY FRIENDLY ALTERNATIVE TO TRADITIONAL AVIATION FUEL

Our goal? To use a minimum of 30 % of SAF fuel by 2030.

CHOOSE GOGREEN+

Start your transition to more sustainable logistics today.
Choose DHL GOGREEN+:

TO CONTRIBUTE TO THE PURCHASE OF SAF: On MyDHL+ portal, you can book a pickup and choose GoGreen Puls even for individual shipments. Your contribution will be invested in the purchase of SAF.

CONTINUING CONTRACT: You can stipulate a GoGreen+ contract based on your needs. This will allow you to lower your Scope 3 emissions, depending on your company's sustainability goals and investment capability.

By investing in SAF, you reduce your company's Scope 3 emissions and receive an annual certificate canvalidated by Société Générale de Surveillance (SGS) that can be included in the sustainability report.
