

WE MOVE YOUR FOOD

SERVICES & SOLUTIONS – FOOD & PERISHABLE SECTOR

FOOD EXPERTS IN ACTION

At DHL we strive to develop tailored service solutions for our Customers, in any Industry Sector, including core transportation and value added services.

We do it every day, guided by our values, supporting the United Nations Sustainable Development Goals for our Planet.

MOVING YOUR FOOD

Fast moving is the key factor in getting meat, cheese, fish, vegetables and fresh fruit from producer to store shelves.

With the DHL Food & Perishable Competence Center expertise we aim to be a point of reference for the Food Industry to enable their business growth.

How do we do it? We constantly operate to deliver the best Customer Experience, increasing the efficiency in terms of lead times and costs, supported by dedicated teams of experts in the food and perishable handling, and customize each service solution.

EXCELLECE FOR ITALY'S EXCELLENCES

End-to-end services for fine food, perishable, frozen and deep frozen products require expertise and dedicated temperature controlled logistics infrastructures. DHL Food & Perishable Competence Center provides all that and much more. Supported by three cold rooms for food dedicated operations in Milan, Rome and Naples, DHL Food & Perishable Competence Center enables the distribution of the Made in Italy food excellences all over the world.

Competence Center

- Temperature controlled rooms with the following ranges: -20°C ; $+2/+8^{\circ}\text{C}$ and $+15/25^{\circ}\text{C}$.
- Temperature monitored with automatic alert in case of deviation. Data is stored for 30 days.
- HACCP guidelines compliance.
- Certified staff, CCTV, anti-intrusion and TAPA Compliant.

Storage areas for dry food is available, in accordance with the highest standards of safety and hygiene.

SKY HIGH QUALITY

Air freight is a strategic transportation mode for highly perishable products. That's why we have developed a wide range of state-of-the-art solutions, starting from the "in house" loading and unloading of Envirotainer and Unicooler containers with active maintenance of the set temperature. Passive containers are also available equipped with eutectic plates, dry ice and thermal blankets. Our thermal box units have variable sizes, from 80x120x100 cm (max.250 Kgs) to 80x120x140 cm (max. 400 Kgs). Once packed, your products will enter DHL's Air freight network and will be delivered at destination in the quickest and safest way.

ON THE WAVE RIDGE

For the products which can afford longer transit times, ocean freight transportation is the effective price alternative solution.

DHL's offering includes Full Container Load dry and reefer solutions for fresh and frozen products, as well as tanks for liquids and isotanks for grain transportation.

Customer consolidation solutions are available to handle several suppliers to a single importer. In addition to seals, our Ocean Secure solution allows us to react to events, from door to door, with short notice to take the required action, in case an unforeseen event is detected as to temperature deviation, door opening or a container which is not on-route as scheduled.

Track & Tracing, Customer Reporting and Quote & Book functions are provided by DHL state-of-the art customer digital interface **myDHLi**
