

GOGREEN!

INTERESTED IN GOING GREEN WITH US?

Please contact your DHL sales team for more information.

Although we're working hard to deliver green around the world, please note that not all DHL GoGreen Solutions are currently available in every country we serve.

Learn more about environmental protection at Deutsche Post DHL Group in our Corporate Responsibility Report – accessible online at www.dpdhl.com/responsibility.

MISSION 2050
ZERO EMISSIONS

GREEN LOGISTICS IS POSSIBLE!

DHL is a leader in the field of green logistics.

We've been greening our own operations and network since 2008 when we launched our GoGreen environmental protection program. To realize a more sustainable future we think it's important to think big. Our bold climate protection target is to reduce all logistics-related emissions to zero by the year 2050.

As a customer, you automatically benefit from our improved environmental footprint every time you purchase any of our standard products or services.

The experience and expertise we've gained from our global GoGreen program allows us to build DHL GoGreen Solutions for you.

But don't just take our word for it. Our environmental achievements have been recognized by a number of independent parties, including CDP and EcoVadis which give Deutsche Post DHL Group top scores. Additionally, we are listed on the Dow Jones Sustainability Indices World and Europe.

With DHL GoGreen Solutions, you have an opportunity to benefit from recognized green experts and gain both environmental and commercial advantages for your own supply chain.
