

PALLET PRICE LIST

This Pallet Price List applies to companies and institutions, following written arrangements contained in a separate agreement concerning the provision of shipping services.

Applicable as of 1 January 2025

PALLET PRICE LIST – BASIC CHARGES

Distance	Weight of the shipment				
	200 kg	400 kg	600 kg	800 kg	1,000 kg
100 km	169	196	244	303	362
300 km	328	384	463	541	633
900 km	440	486	572	658	705

HOW TO CALCULATE THE COST OF A SHIPMENT

DESCRIPTION OF THE SERVICE

Weight and dimensions of each item in a shipment (including packaging):

- “Pallet” term means goods placed on a pallet with dimensions: 1.2 x 0.8 m, 1.2 x 1.0 m, 1.2 x 1.2 m. The pallet is a single item of shipment, provided that 1.2 x 1.0 m pallets and 1.2 x 1.2 m are treated as a non-standard item.
- The maximum height of the shipment is 2.1 m (including the pallet). The weight limit of the goods including the pallet is 1,000 kg. The weight and dimensions of the pallet/package are included in the weight and dimensions of the shipment elements.
- Maximum weight of a shipment 2,500 kg.
- Palletized shipments being sent to a single consignee and weighing over 2,500 kg, or shipments consisting of more than 5 pallets, can be processed on separate terms upon consultation with the DHL eCommerce Customer Service Department. If shipments containing more than 5 pallets are to be sent to a single consignee without prior consultation with the DHL eCommerce Customer Service Department, the time frame for delivering each subsequent shipment beyond the first shipment will be extended:
 - (a) if delivery is to be made on the next business day – by one business day or more, depending on the number of shipments sent;
 - (b) if delivery is to be made within two business days – by two business days or a multiple thereof, depending on the number of shipments sent. DHL eCommerce will determine the order of deliveries.

Pick-up and delivery:

- In areas accessible by delivery trucks the service is performed on ramp to ramp.
- Pick-up and delivery involves placement of the shipment and its removal from the open load-carrying body¹. Additional loading

and unloading activities are the customer’s responsibility.

- Shipments are typically collected from Monday to Friday and delivered on the next business day or within 2 business days².
- A request for a DHL eCommerce courier to collect a shipment can be placed via online tools provided by DHL eCommerce or by phone with the DHL eCommerce Customer Service Department. Regular pick-ups can be scheduled upon prior agreement with a DHL eCommerce Sales Representative.

Method of calculating of the charges:

- If the contract is concluded according to the pallet price list, the charge for all shipments containing only elements on pallets with the following dimensions: 1.2 x 0.8 m, 1.2 x 1 m, 1.2 x 1.2 m is calculated according to the pallet price list.
- There is an additional charge for each non-standard item.
- Calculated for each item is the volumetric weight according to the following conversion rate: $[\text{length (cm)} \times \text{width (cm)} \times \text{height (cm)}] / 4,000$ or 1 m^3 of the shipment = 250 kg. The rule is to select the greater weight (actual or volumetric).
- The price of a shipment is calculated after adding up the greater weights of each item.

¹ This does not apply to pick-ups and deliveries carried out using the following vehicles: truck-tractor with an articulated trailer, car with an articulated trailer with a loading capacity of 24 t, car without a trailer with a loading capacity of 5 t or higher.

² For more information about the time of delivery offered, please contact the DHL eCommerce Customer Service Department.
