

Fuel surcharge applicable to road freight services, valid as from 1st January, 2026

A fuel surcharge will be added to the basic shipment transportation cost (before value-added services costs). It is applicable for all road freight services. Based on the fluctuation of fuel costs¹, the fuel surcharge will be adjusted accordingly each month, with the surcharge index published in advance, based on the net fuel price published by PKN Orlen (<https://www.ornlen.pl/pl/dla-biznesu/hurtowe-ceny-paliw>).

DHL Freight (Poland) Sp. z o.o. reserves the right to change the fuel surcharge index and table without notice.

Both amount and duration of the fuel surcharge will be determined at DHL's sole discretion.

Due to sharp increase in fuel prices, effective 08 March 2026, the calculation of the fuel surcharge shall be based on a comparison of the fuel price from the baseline period with the average fuel price from previous week. This calculation assumes that the August 2021 baseline represents 25% of the total transport cost and is subject to upward rounding to the nearest 0.25 percentage point

$$FSk = (FPt / FPb - 1) * CPb$$

meanings:

FSk – fuel surcharge in the applicable period;

FPt – average fuel price from previous week, based on PKN Orlen data;

FPb – average net diesel price on the 08.2021, based on PKN Orlen data;

CPb – 25% fuel cost share in the total transportation costs at the base date.
