

Fuel surcharge applicable to road freight services, valid as from 1st January, 2025

A fuel surcharge will be added to the basic shipment transportation cost (before value-added services costs). It is applicable for all road freight services. Based on the fluctuation of fuel costs¹, the fuel surcharge will be adjusted accordingly each month, with the surcharge index published in advance, based on the net fuel price published by PKN Orlen (<https://www.orken.pl/pl/dla-biznesu/hurtowe-ceny-paliw>).

DHL Freight (Poland) Sp. z o.o. reserves the right to change the fuel surcharge index and table without notice.

Both amount and duration of the fuel surcharge will be determined at DHL's sole discretion.

It is calculated as the fuel cost participation in the total transportation costs, assuming that net fuel price at the 08.2021 had a 25% share in the total transportation cost, within rounding up to 0,25 percentage points.

$$FSk = (FPT / FPb - 1) * CPb$$

meanings:

FSk – fuel surcharge in the applicable period;

FPT – average net diesel price in the 15th of preceding fuel surcharge publication month and 14th of the fuel surcharge publication month period, based on PKN Orlen data;

FPb – average net diesel price on the 08.2021, based on PKN Orlen data;

CPb – 25% fuel cost share in the total transportation costs at the base date.
