

Country-specific shipping requirements

Country	Regulatory requirements	Applicable to	Required actions
Cyprus	A commercial invoice and packing list are required to prove the Union status of the goods and, if applicable, for the issuance of a T2L document. For deliveries to private individuals, copies of the recipient's ID documents must be provided.	Shipments to Cyprus.	Ensure that a commercial invoice and packing list are included with the shipment. Documents can, for example, be uploaded in myDHLFreight when booking. Attach copies of the recipient's ID documents (front and back) for deliveries to private individuals.
Greece	The sender's and recipient's VAT registration numbers must be provided.	Shipments to/from Greece.	Provide the sender's and recipient's VAT numbers. For deliveries to private individuals, EL000000000 can be used. The information is entered in the designated fields in, for example, myDHLFreight.
Poland	SENT information is required for goods covered by the Polish SENT monitoring system.	Shipments to/from Poland where the goods are subject to the SENT regulations.	Enter the SENT reference number and Carrier Key Code in the shipment information. Booking and transport administration (TA) systems should, as in myDHLFreight, have designated data fields for providing this information.
Romania	A UIT code is required for goods covered by the Romanian e-Transport System.	Shipments to/from Romania if any of the following criteria are met:: - Gross weight exceeds 500 kg - Vgross value exceeds 10 000 RON - The goods are clasified as high-risk goods (fiscal goods)	Enter the UIT code received in the shipment information. The code is provided by the Romanian party. If the goods are not subject to the requirements, enter "UIT FREE". Booking and transport administration (TA) systems should, as in myDHLFreight, have designated data fields for providing this information.

Spain	A Material Safety Data Sheet (MSDS) is required for dangerous goods.	Shipments of dangerous goods to/from Spain.	Attach both the dangerous goods declaration and the Material Safety Data Sheet (MSDS). Documents can, for example, be uploaded in myDHLFreight when booking.
Hungary	EKAER information is required for goods covered by the Hungarian EKAER control system.	Shipments to/from Hungary where the goods are subject to the EKAER regulations.	Enter the EKAER number in the shipment information. The number is obtained from the Hungarian party. If the goods are not subject to the requirements, enter "EKAER FREE". Booking and transport administration (TA) systems should, as in myDHLFreight, have designated data fields for providing this information
Countries and postal codes subject to customs requirements	Customs documentation and any country-specific documents are required	All shipments subject to customs requirements.	Ensure that the required customs documents are provided when booking. Documents can, for example, be uploaded in myDHLFreight. See also DHL Freight's customs information for current requirements.

Important considerations

- Missing or incorrect information may result in delays, additional costs and/or holds and fines imposed by authorities
- Enter all required information when booking to ensure a smooth transport process.
- **Important:** Customers booking through their own transport administration (TA) system are responsible for ensuring that the required fields and information are available in the system. If necessary, contact your TA system provider to make the required adjustments.

Document upload

- Required documents can be uploaded directly when booking, for example in myDHLFreight. If it is not possible to upload documents, they can instead be sent to dhlfreight.int.se@dhl.com.

If you have any questions regarding document requirements, please contact DHL Freight Customer Service.
