

DHL VALUE ADDED SERVICES - PRIVATE CUSTOMERS

YOUR CHOICE

When you offer delivery to private customers, service, precise delivery times and flexibility are important. With DHL you can offer all this – and much more. Tailor your delivery offering to the needs of your customers and always have full control throughout the transport flow.

PRIVATE CUSTOMERS

Whatever the size of your business or the size of your consignment – from a small parcel to larger PTL/FTL shipments and more – we can help you. Our value added services make it easy to quickly and smoothly adapt our transport solutions to the needs of your business.

At the start of this presentation, you will find a summary of all our value added services for deliveries to business customers. Under each service, you can read about how it works and practical information, such as booking, price and combination rules.

Finally, we would like to remind you that all our value added services are covered by our “Product specific terms and conditions”. For more detailed information about each service, see the separate document “DHL Product specific terms and conditions – domestic”.

If you are unsure about anything, you are always welcome to contact our Customer Service.

PRIVATE CUSTOMERS

FREIGHT COST

There are four factors that influence the total price of our deliveries. How it works: Firstly, all of our services have a freight price, plus a fuel surcharge. Other surcharges can then apply for delivery to certain places or for dangerous goods, for example. The price is also influenced if you choose to customise your transport with our value added services, such as Skicka grönt (Go Green), Indoor delivery or Evening delivery.

Finally, there are fees that can be avoided by ensuring that all tasks are completed correctly. If you are unsure of anything, you are always welcome to contact our Customer Service.

THIRD PARTY FREIGHT PAYER

WE INVOICE THE THIRD PARTY – NOT THE CONSIGNOR OR CONSIGNEE

In a transport chain, there are many occasions when a “Third party freight payer” is useful. An example of this is when neither the consignee or the consignor are responsible for paying the freight.

In a transport chain, this value added service is often used by a party acting only as the stockholder.

SKICKA GRÖNT WITH DHL

SKICKA GRÖNT REDUCES THE ENVIRONMENTAL IMPACT IN A SMART AND EFFICIENT WAY

By selecting SKICKA GRÖNT, the customer can reduce the environmental impact of their transport and boost development of the transport sector right here and now. The revenues are used to invest in vehicles with cost driven environmental technology. Something that will guarantee environmental benefits within our Swedish transport network.

With SKICKA GRÖNT, we can work with you and your customers to seriously reduce emissions of carbon dioxide, where it would otherwise be impossible without your contribution.

Each time you or your customers book SKICKA GRÖNT, you are buying shares in our overall capacity of CO2 reducing freight. The shares are not linked to any specific route. Instead, SKICKA GRÖNT enables us to replace a fossil transport section with vehicles running on renewable fuels, where they will have the most impact.

The whole process, from production to sales, is verified by an independent party.
