

DOMESTIC

SMARTMAIL PARCEL RETURN

Looking to simplify and expedite your returns? Need a cost-effective alternative to the domestic return service you're currently using? We have the perfect solution: DHL SmartMail Parcel Return.

Convenient for consumers. Simple for you.

Returns are a daily reality – but they don't have to be a daily hassle. DHL SmartMail Parcel Return™ reduces the complexity of processing returns while providing end-to-end visibility via our Customer Web Portal. With a simple pricing structure, both you and your customers can benefit from our hassle-free, fast and reliable DHL SmartMail Parcel Return service.

Our Workshare partnership makes it all possible.

The DHL SmartMail Parcel Return product allows your customers to return parcels by placing them directly in their mailbox or at any U.S. Postal Service (USPS) collection site, with visibility throughout the entire process. Easy market integration, faster transit times, precise tracking and reporting, and remarkable customer service make DHL SmartMail Parcel Return the superior choice for processing returns.

DHL SmartMail Parcel Return offers end-to-end visibility and tracking from label creation to final delivery. Tracking events are captured as your consumer's returns are expedited through the postal network.

SERVICE LEVELS

Three product options make DHL SmartMail Parcel Return both convenient and efficient.

--------------------------	------------------------------------	--

DHL eCommerce Solutions – Excellence. Simply delivered.

LABEL DELIVERY METHODS

With six label delivery methods to choose from, DHL SmartMail Parcel Return ensures that your unique business needs are met.

Online/On Demand Label Solutions

Email Label Merchant emails return label to consumer using DHL eCommerce Solutions Web Portal

Consumer API Consumer generates label by accessing merchant's API-enabled website

Link Label Merchant creates multi-use or single-use DHL SmartMail Parcel Return link, which consumer uses to print label after entering required Information

Stuff-the-Box Label Solutions

Stuff-the-Box (via DHL eCommerce API) Merchant pre-prints label using API interface and inserts label in outbound shipments

Batch Label DHL eCommerce Solutions pre-prints return labels in batches and ships return labels to the merchant

Return Shipment File (RSF) Merchant prints labels according to a label specification template and inserts them in outbound shipments; merchant uploads end-of-day shipment file (RSF) to DHL eCommerce Solutions for tracking and reporting in the Customer Web Portal

Our Web Portal – your returns management dashboard.

This robust yet easy-to-use online tool provides all the key information you need to monitor and manage all of your returns. Access it anytime, from anywhere – 24/7.
