SIMPLIFIED TRANSPORTATION FOR BULK NON-HAZARDOUS LIQUIDS

Reduce your shipping costs with DHL’s state-of-the-art Flexitank solutions.

DHL FLEXITANKS offer a safe, streamlined, and more environmentally friendly way of reducing transportation costs for non-hazardous liquids. DHL’s flexitank solutions overcome the problems associated with traditional methods of shipping non-hazardous liquids in large volumes.

ISO tank containers bring the need for return loads, long-term leasing agreements, and expensive cleaning procedures to avoid cross-contamination. IBC totes and drums fail to provide optimal container usage – increasing the need for packaging, handling and loading. Combined, these factors get in the way of supply chain efficiency and seriously increase your shipping costs.

The DHL FLEXITANK is a multi-layered bladder that holds up to 24,000 litres and fits into a standard 20ft ocean freight container. It makes every inch of container space available to be exploited for transportation purposes: you can ship up to 31% more cargo compared with standard methods.

DHL Global Forwarding
Ocean Freight
DHL FLEXITANKS

What exactly can be transported in DHL FLEXITANKS? In short, a whole range of non-hazardous liquids, including (but not limited to): agricultural oils, liquid latex, wine, fruit juice, bio-fuels, glycerin, and non-hazardous industrial chemicals.

First class coverage
At DHL Global Forwarding, we only work with first-tier manufacturers. Incidents of leakage are therefore rare. Still, our manufacturing partners have insurance in place to protect against potential product liabilities arising from any Flexitank failure. Liability coverage is provided at a minimum of $5 million per single Flexitank issue and extends to DHL Global Forwarding.

What’s more, DHL FLEXITANKS are recyclable, effectively eliminating the costs and environmental impact of container cleaning or disposal. And by removing the need for return load transportation, your shipping costs are effectively reduced.
BENEFITS AT A GLANCE

• Minimize your freight charges
  There’s no need to return the Flexitank – so you only pay one-way international freight costs.

• Enjoy an all-inclusive service
  From selling and fitting the Flexitank, to handling your end-to-end logistics, DHL offers a complete Flexitank service.

• Transport more liquid in every container
  Make big savings by transporting up to 31% more liquid in each container (versus IBC totes or drums).

• Save money on loading and unloading
  Loading and unloading times are reduced by 90% compared with IBC totes or drums.

• Reduce your cleaning costs and ‘go green’
  Flexitanks are single-use. They can be disposed of or recycled, eliminating expensive cleaning procedures that harm the environment.

• Save money on bulk liquid packaging
  Raw goods are delivered to filling destinations for more economical packaging and distribution.

• Eliminate the risk of contamination
  Manufactured using virgin films, Flexitanks are also disposable so there’s no danger of cross-contamination.

WHY DHL FLEXITANKS?

Choosing DHL brings a host of benefits. You’ll enjoy:

• Full supply chain visibility – 24/7 online tracking and regular email updates to nominated stakeholders

• Global flexibility – a carrier with capacity and worldwide reach

• No surprises – clear, transparent and predictable costs

• Peace of mind – on-time delivery, every time
