

Dear Customer,

Regulatory authorities across the globe are rapidly moving toward a **fully digital data-driven environment**. This means that **providing accurate electronic information** has become the key to ensuring compliance for a faster, more efficient Customs clearance experience.

Regulatory update: Import Control System 2 (ICS2)

March 2023, the Regulatory authorities in the **European Union (EU)** will implement phase 2 of a new security screening system known as **Import Control System 2 (ICS2)**.

All goods, **transported by air either destined to (or transiting via) the European Union, Switzerland & Norway** are in scope of ICS2. Given that DHL Express works to ensure the fastest possible transit time, airplanes may be routed through the EU at any time. Therefore, **all shipments from any origin to any destination worldwide may be impacted** by the upcoming ICS2.

As an important part of this process, authorities closely review your Commercial/ Proforma Invoice. So, by sharing a **precise description of your goods with DHL electronically** on your Commercial invoice, including the correct HS code, clearance of your shipment can begin immediately – and we can deliver it even more quickly.

Detailed and accurate electronic data means quicker delivery

Accelerate process by sending accurate data to DHL

Avoid delays caused by missing or wrong information

Ensure a smooth Customs Clearance experience

MyDHL+ makes it easy

When you ship online with MyDHL+ and provide **electronic Commercial/ Proforma Invoice** data, we'll help you:

- Describe the items in your shipment **completely** and **accurately**
- Submit your shipment details and invoice data **electronically**

- Ensure that your customs declaration is submitted to Customs Authorities **before your shipment lands** (where allowed)

Please click on the button below for more detail about electronic data quality.
